PROFILE

I am a Front-End Web Developer from Denver, CO who is an absolute technology geek. I love geeking out on all things JavaScript and React. I have a high passion for building user-focused websites and wanting to learn more. I aspire to join a team that values collaboration, agile processes, and developer growth.

EXPERIENCE

DevMountain - Web Developer

Hiut Clone

Lehi, UT, May - Jun 2019

hiut-clone.happycoder.io

React.js | Redux | Axios | Node.js | Express | Massive | SQL | BcryptJS | JavaScript | Sass | Stripe | Amazon S3 | Nodemailer

Clone of Hiut Denim's eCommerce site.

- Node.js, Express, Massive, SQL for handling requests and database for the backend. BcryptJS for authentication. Sass, CSS, JavaScript, Axios, React.js, Redux, and Stripe for the stylings and e-commerce functionality on the front-end. Amazon S3 to host product and collateral images.
- NodeMailer to send a password reset link via email.
- Incorporated responsive design for mobile devices.

DevMountain - Web Developer

Brodium

Lehi, UT, Jun 2019

brodium.dtour.world

React.js | Redux | Axios | Node.js | Express | Massive | SQL | BcryptJS | JavaScript | Sass | Cron | Amazon S3 | Nodemailer | Socket.io | Cypress

Workplace communication platform that brings in customer reviews as context for discussion.

- Node.js, Express, Massive, REST APIs, SQL for handling requests and database for the backend. BcryptJS for authentication. Sass, CSS, JavaScript, Axios, React.js, and Redux for the stylings and functionality on the front-end. Amazon S3 to host user profile images. Cypress for end-to-end testing.
- NodeMailer to send an email containing a link to initiate the team member onboarding process. Chat rooms created using Socket.io. Cron was utilized to query Google Places for business reviews once a day.
- The entire app was built using React hooks.

PRO, IS Inc. - Underwriting Assistant

York, PA, May - Oct 2018

- Reviewed accounts to ensure adherence to quality standards.
- Utilized Microsoft Excel to perform data analysis and processing.
- Completed data entry using a combination of proprietary terminal and Windows GUI applications.

United States Postal Service - PSE Mail Processing Clerk

Boulder, CO, Nov 2016 - Oct 2017

- On a daily basis, utilized proprietary applications on a handheld device operating Windows Mobile, to help sort outgoing and incoming mail.
- Managed ever-changing priorities daily.
